

## **Vinpower Digital announces 3rd Generation SharkCopier series.**

*Los Angeles, CA – August, 2007*

Vinpower Digital is pleased to announce the 3<sup>rd</sup> generation SharkCopier standalone manual tower duplicator. The new models have the same look and appearance as previous models, but offer an array of improved features. Never satisfied with good enough, Vinpower Digital constantly pushes the envelope to develop new features and enhance their existing product to stay in tune with the customers' needs and expectations.

The 3<sup>rd</sup> generation SharkCopier is now available with an unrivaled 15 drives providing a range from 1 to 1 up to 1 to 15 to fit the needs of even the most demanding duplication job. In addition, all 3<sup>rd</sup> generations models now offer dynamic hard drive partitions and the new Simultaneous Load & Copy feature. Of course they will still offer exceptional duplication capability at lightning fast speed along with market leading features like Account Management, Auto Counter, Multi-language support, Drive firmware upgrade ability, and so much more that helped make the SharkCopier the preferred duplicator.

Dynamic hard drive partitioning allows the user to load masters of any size onto the hard drive (HDD) and they will only take up the exact space necessary rounded up to the nearest GB. Typically the HDD needs to be partitioned in set sizes that are the same regardless of the amount of data stored in that partition. For example, if the partitions were set at 5GB, then even if you only loaded 1 GB of information, it's still using 5GB of space on the HDD. Now using the 3<sup>rd</sup> generation SharkCopier, if you loaded 1GB of data, you only use 1GB of space on the HDD. This allows the user to store far more data on the HDD and mix various formats of media (CD, DVD5, DVD9, etc) on the HDD without fear of wasting valuable storage space.

Simultaneous Load & Copy allows the user to load the master disc to the HDD while making the first run of copies "on the fly". Every run that follows will be copied from the data stored on the HDD. Using the HDD as the source is a far more reliable and preferred method to copy discs, especially DVD at 8x or faster speeds. Instead of wasting time waiting for the master to load to the HDD then begin

making the copies, you can have the first set of copies made simultaneously from the master in the reader as it's loading to the HDD. The new Simultaneous Load & Copy feature saves time and provides the best quality duplication possible.

Whether you need to make 10 copies a month or 10000 copies a day, Vinpower Digital has the quality equipment to meet your needs at pricing for every budget. If you want the best, you want the SharkCopier!

### **About Vinpower Digital**

Vinpower Digital is the leading manufacturer of standalone optical disc duplication equipment. With our corporate office in Los Angeles, California, USA and production offices in Taipei, Taiwan, we have the ability to deliver the most advanced and reliable standalone optical disc duplication controllers, manual towers, and robotic autoloaders anywhere in the world. As a true manufacture, Vinpower Digital has the ability to OEM/ODM customized applications and equipment for qualified vendors on a number of levels.
