■■■ Key Features

- Complete Standalone Operation
- Transfer files from any PC within an internal network directly to the duplicator: Connect the duplicator to the company's internal network by LAN/Ethernet connection and transfer the image or file(s) that need to be duplicated directly to the duplicator. No longer need to burn a master disc to initiate the duplication process.
- Copy Protection Technology: Using our exclusive Copy Protection Software (CPS), the user can feel secure that their video content is protected against unauthorized copying and ripping!
- Simultaneous Load and Copy: Copies data to the duplicator's hard drive and writer drives simultaneously on the first run from the reader drive so that all additional runs will be made from the hard drive
- Continuous Hard Drive Partitioning: The HDD partitions are created without limitations using the same amount of space as the actual content size on the disc
- Expanded CD Capabilities: Supports all common CD formats including CD-TEXT, ISRC, Over-Burned CD
- Drive Firmware Upgradeability: Capable of upgrading the drive's internal firmware directly through the Duplicator
- Expanded 128MB Buffer Memory, keeps all drives burning without pausing (known as buffer underrun) for the most stable and reliable high speed duplication

■■■ Additional Features

- AutoCopy feature: Fast duplication without pressing any buttons
- Account Management (Password Protection): This function will authorize only specific user(s) to operate the duplicator with their preferred settings
