Using the Pioneer BDR-206MBK BD writer drives, Vinpower Digital is able to offer duplication for the BDXL media in up to 15 drives at once.

Los Angeles, CA (Vocus/PRWEB) March 22, 2011

AdChoices

Vinpower Digital announced today the availability of their latest Blu-ray Disc duplicator lines with the ability to copy the amazingly large capacity BDXL media, which offers capacities up to 128GB per disc.

Using the Pioneer's BDR-206MBK Blu-ray Disc writer drive(s) combined with the exceptional performance of the Vinpower manufactured line of manual tower and autoloader duplicator series, provides reliable high quality copies of Blu-ray master disc(s) for projects requiring higher capacity than the standard 25GB BD-R or even 50GB BD-R DL.

"Blu-ray as a format has already opened the doors to greater storage capability for all aspects of digital storage, yet innovations in fields such as 3-D video content and archival storage have created a need for even higher capacity," explains Vinpower Digital C.E.O., Calvin Chang. "So, the introduction of the BDXL media opens the door to greater creativity and development across all content creation, especially in the field of filmmaking. That's why it was critical that Vinpower offer duplication equipment with the Pioneer BDR-206MBK drive, which is capable of reliably copying this new higher capacity media format."

Using the Vinpower Digital Blu-ray duplicator with BDXL media, will allow the user to store up to 128GB of information on a single write once disc, which can be stored and protected from the elements or human error for many years. This is especially useful in the medical, financial, judicial, law enforcement, and legal fields, as well as any other field where important content needs to be kept safely on file for an extended period.

"The new BDR-206MBK represents Pioneer's continuing effort to be the first to develop and market next generation technology within the optical disc drive field. We're very pleased that Vinpower Digital has followed suit in adopting this new drive as an essential element of their new product line," said Andy Parsons, Senior Vice President of New Product Development at Pioneer Electronics (USA) Inc.

Vinpower Digital's lines of standalone Blu-ray Disc duplication towers are available in multiple drive configurations, from one up to an astounding 15 Blu-ray disc writer drives in a single duplicator. In addition, Vinpower's line of autoloaders also boasts impressive drive and disc capacity for reliable unattended mass duplication. Vinpower Digital developed the new line of BDXL capable duplicators to enable users to make exact digital copies of their original Blu-ray, DVD, and/or CD masters. The BDXL Disc duplicators come standard with a massive hard drive for ample storage of multiple high capacity video or data files in the BDXL Disc format. Additionally, Vinpower offers USB (3.0/2.0), eSATA, and Ethernet/LAN connections to enable fast reliable transfer of content from a computer onto the duplicator's HDD or to a writer drive to produce the master disc, which enables the duplication process.

Vinpower Digital has teamed with the Optical Quantum line of Blu-ray Disc recordable media to ensure the highest quality Blu-ray Disc duplication. Optical Quantum offers an assortment of recordable Blu-ray Disc
