Vinpower Digital Expands Their Product Line of Blu-ray Duplication Equipment

Wednesday, August 27, 2008 10:00 EST

To meet the growing consumer needs for Blu-ray content, Vinpower Digital releases three new lines of Blu-ray capable duplicators.

Los Angeles, CA (PRWEB) August 27, 2008 -- Vinpower Digital announced today the upcoming release of three new Blu-ray capable duplicator series in September 2008. Keeping in step with the growing market trends towards the Blu-ray format, Vinpower Digital will upgrade their popular TITAN series as well as the new Cube and Daisy Chain lines to include the high capacity Blu-ray format.

The TITAN Blu duplicator line is a series of standalone robotic autoloaders ranging from 3 to 8 Blu-ray drives offering a disc capacity of 100 up to 1000 discs depending on the model. The TITAN series has long been preferred in the duplication field for its reliability, lights out operation, Multi-Master Recognition

Technology (aka batch mode) capability and user friendly interface. With a bevy of drives and large volume disc capacity, the TITAN series is perfect for companies requiring large throughput in a shorter time period. The industrial strength TITAN Blu-ray series maximizes output while minimizing effort and expense.

The Blu Cube series is available with 1 or 2 Blu-ray drives and 25 disc capacity in a small compact case. The Blu Cube offers many of the options and benefits expected from the Vinpower Digital line of automated duplicators in a compact casing that is only dwarfed by its minute price tag. With a retail price below \$1000 for the single drive version, The Blu Cube is extremely beneficial to those who need to duplicate small to medium quantities of Blu-ray discs in a short period of time without requiring the user to manually load and unload the discs.

"With a significantly greater disc capacity for Blu-ray discs in comparison to DVD, it's understandable that the time frame for duplication would be extended as well. It's for that reason that affordably priced robotic autoloader duplicators make perfect sense for the user with more production than time," proclaims Ryan Swerdloff, VP of Marketing and Sales for Vinpower Digital.

With the maturity of the Shark-Blu standalone manual tower series of Blu-ray duplicators, Vinpower Digital will release a Daisy Chain version for greater output in a shorter time span. The Shark-Blu Daisy Chain series offers the ability to link multiple standalone manual tower Blu-ray duplicators together controlled by a single source. The Shark-Blu Daisy Chain line allows the user to make thousands of Blu-ray copies from a single Blu-ray master source simultaneously in a matter of minutes.

With the rapid adoption of the Blu-ray format in the optical disc field, Vinpower Digital intends to continue the expansion of Blu-ray duplication equipment to meet the needs of the growing market.

About Vinpower Digital: Vinpower Digital is the leading manufacturer of standalone optical disc duplication equipment. With corporate offices in Los Angeles, California, USA and production facilities in Taipei, Taiwan, the company is delivering the most advanced and reliable standalone optical disc duplication controllers, manual towers, and robotic autoloaders anywhere in the world. As a true manufacturer, Vinpower Digital has the ability to OEM/ODM customized applications and equipment for qualified vendors on a number of levels. Never satisfied with good enough, Vinpower Digital constantly pushes the envelope to develop new features and enhance their existing product to stay in tune with the customers' needs and expectations.

For further information on any or all of Vinpower Digital's line of duplicators please visit the website at www.vinpowerdigital.com.
