

## **Vinpower Digital announces the new Titan lite Auto Eraser**

*Los Angeles, CA – August, 2007*

Vinpower Digital proudly introduces the Titan lite Auto Eraser, our newest and safest weapon in destroying unwanted information stored on CD's or DVD's. We are living in a digital world and as more information is kept on digital discs, namely CD's and DVD's, there needs to be a safe and effective method to discard this unwanted sensitive material. At the same time, we are living in a more ecologically responsible world, where we recognize the importance of protecting our environment. Previous disc destroyers would shred or punch holes in the discs that could release toxic particles into the atmosphere and creates shards of debris which could cut the skin if not handled properly. The new robotic Titan lite Auto Eraser will permanently erase any information stored on a CD or DVD using the drives internal laser, so there are no harmful particles or shards released into the environment. The drive will use an intense laser to burn off the data making the disc completely unreadable. The drives are completely safe with no danger to the user, unlike a disc shredder where other articles or body parts could accidentally come in contact with the sharp blades. With 3 drives and 100 disc capacity, you can permanently erase data on up to 100 CD's and/or DVD's in a little over an hour automatically while you attend to other matters.

This process will completely eliminate the possibility that portions of the disc may be manually or electronically read and any of your sensitive material leaked. Plus, the Titan lite Auto Eraser does not create dangerous shards from the disc which may cut someone like a disc shredder would. The Titan lite Auto Eraser protects the privacy and confidentiality of any sensitive material that should not be in circulation. It is perfect for any individual or company that keeps sensitive information on CD's or DVD's where they need to quickly and safely discard information from numerous discs. This includes government agencies, medical institutions, military installations, corporations, places of worship, home personal use, etc. The Titan lite Auto Eraser is very easy and safe for anyone to operate. Discard your unwanted data on discs safely and securely with the Titan lite Auto Eraser.

## About Vinpower Digital

Vinpower Digital is the leading manufacturer of standalone optical disc duplication equipment. With our corporate office in Los Angeles, California, USA and production offices in Taipei, Taiwan, we have the ability to deliver the most advanced and reliable standalone optical disc duplication controllers, manual towers, and robotic autoloaders anywhere in the world. As a true manufacturer, Vinpower Digital has the ability to OEM/ODM customized applications and equipment for qualified vendors on a number of levels.
