

Vinpower Digital announces upgrades to their SharkBlu series.

Los Angeles, CA – July, 2007

Vinpower Digital's SharkBlu series now has a full line of sizes ranging from a single writer drive manual tower up to an astounding 11 writer drive duplicator. Vinpower Digital developed the new line of Blu-ray capable duplicators to enable the user to make exact digital copies of their original Blu-ray, DVD, and/or CD masters. The SharkBlu comes standard with a massive 500GB up to 1TB hard drive to enable the duplicator to store multiple video or data files of the large 25GB or 50GB Blu-ray format. With the included USB interface, the unit can be used as an external Blu-ray writer to burn the users' original master disc(s) from their computer. "The larger versions of the SharkBlu duplicators give the user the ability to copy a higher quantity of Blu-ray discs in a shorter time. Plus with the enhanced load and copy feature, the user can copy the first run of discs 'on the fly' while loading the master to the hard drive for each additional run saving even more valuable time and resources" explains Ryan Swerdloff, Vice President of marketing and sales for Vinpower Digital. The SharkBlu series is a multi-faceted external writer/duplicator that allows the user the option of burning their master from the computer and making multiple copies all in one device.

Blu-ray is a new format of optical disc similar to DVD with a much larger capacity. The recordable Blu-ray disc format currently holds 25GB (single layer) to 50GB (double layer) of data compared to the recordable DVD format which can hold 4.7GB (single layer) to 8.5GB (double layer) of data. The added capacity for Blu-ray enables users to hold over 5 times more information on a single disc. This means that full feature video can be shown in High Definition for the highest resolution possible at this time.

For those planning to take advantage of the added capacity and superior video quality possible with Blu-ray discs, they will need a duplicator that will not wilt under the pressure. The SharkBlu offers reliable duplication for all Blu-ray recordable discs as well as lightning fast duplication for DVD+/-R DL, DVD+/-R, & CD-R discs. When you value your project enough to use Blu-ray discs, make sure your duplicator is strong enough to handle the job, make sure you're using the SHARKBLU!

About Vinpower Digital

Vinpower Digital is the leading manufacturer of standalone optical disc duplication equipment. With our corporate office in Los Angeles, California, USA and production offices in Taipei, Taiwan, we have the ability to deliver the most advanced and reliable standalone optical disc duplication controllers, manual towers, and robotic autoloaders anywhere in the world. As a true manufacturer, Vinpower Digital has the ability to OEM/ODM customized applications and equipment for qualified vendors on a number of levels.
