

Vinpower Digital introduces the newest model in our vaunted SHARKCOPIER line of CD/DVD duplicators: The 11 target true 16x DVD standalone manual duplicator

Los Angeles, CA – November, 2005

Vinpower Digital, a rising innovator in the field of optical disc duplication equipment, announces the newest addition to their popular SharkCopier DVD/CD duplicator line. The 11 target SharkCopier, utilizing Vinpower Digital's own standalone VPD11T controller, offers the ability to duplicate 11 blank discs simultaneously in a single tower. As a Research & Development based company, Vinpower Digital is a forward thinking proactive company, dedicated to providing higher quality and more user friendly options for the end user. The SharkCopier was the first to offer the auto counter, hard drive partition naming, load and copy, password protection, the ability to do drive firmware upgrades through the duplicator for specific drive manufactures, true 16x DVD burn speed, account management, and the quick and easy auto copy function just to name a few.

The SharkCopier series is available with 2 up to 11 recording drives and provides the highest quality copies at true 16x DVD burning speed, showing once again Vinpower Digital is the top innovator for standalone duplicators. No other standalone manual tower available today offers a true 16x DVD burn speed with more drives or higher quality than the SharkCopier series.

Whether you're looking for a manual loading CD/DVD tower duplicator, large capacity robotic auto-loading CD/DVD duplicator, or something in between, Vinpower Digital has the solution for you. All of our duplicators are completely standalone which do not require a computer interface to function.

About Vinpower Digital

Vinpower Digital is the leading manufacturer of standalone optical disc duplication equipment. With our corporate office in Los Angeles, California, USA and production offices in Taipei, Taiwan, we have the ability to deliver the most advanced and reliable standalone optical disc duplication controllers, manual towers, and robotic autoloaders anywhere in the world.
