Vinpower Digital Introduces 2nd Generation SharkCopier DVD/CD and the Titan Pro Autoloading Duplicator Series

Posted Apr 15, 2005

[Print Version](#) Page 1 of 1

Vinpower Digital has announced the 2nd generation of their SharkCopier DVD/CD duplicator. The SharkCopier II, utilizing Vinpower Digital's own stand alone VPD7T controller, enhances the SharkCopier with the ability to do drive firmware upgrades through the duplicator for specific drive manufactures, 16X burn speed, account management, and the quick and easy auto copy. The 2nd generation is available with 2 up to 7 recording drives.

Wherever you need remote eyes, right now, in real time. Attach your video camera to a wirelessly-connected mobile computer and instantly transmit streaming video from remote, in-the-field, point-of-action locations.

In addition to the SharkCopier II, Vinpower Digital has introduced the brand new Titan Pro standalone robotic autoloading CD/DVD duplicator. Using Vinpower Digital's VPDAL controller, the TITAN PRO comes with 4 up to 8 recording drives and a capacity of between 500 to 1000 discs that can run continuously with very little human interaction, according to Vinpower.

Vinpower has also announced the future release of the Titan Lite. The Titan Lite has all the benefits of the Titan Pro in a compact 3-drive, 100-disc capacity frame. Approximately 1/3 the size of the Pro series, the Titan Lite can be placed easily in any office space and will have an estimated price competitive to that of a manual tower.
