Vinpower Digital Introduces Two New Duplicators

Posted Apr 15, 2005

 [Print Version](#) Page 1 of 1

Vinpower Digital, a provider of optical disc duplication equipment, has announced the second generation of their SHARKCOPIER DVD/CD duplicator. New for the second generation is the ability to do drive firmware upgrades through the duplicator for specific drive manufactures, true 16x burn speed, and account management. The duplicator is available with 2 (up to 7) recording drives.

In addition to the SHARKCOPIER II, Vinpower Digital has introduced the new TITAN PRO stand-alone, auto-loading CD/DVD duplicator. By utilizing Vinpower Digital's VPDAL controller, the TITAN PRO comes with 4 (up to 8) recording drives and a capacity of between 500 to 1000 discs that can run continuously with little user-interaction. The TITAN PRO is ideal for those with high volume duplication needs.
