# Videomaker's Best Picks 2012

The best video production products of 2012, selected by the editors of *Videomaker*

This has been another incredible year for video products and video production enthusiasts at all levels. We've seen more powerful editing systems and software, and a miniaturization of audio and lighting systems to meet the needs of DSLR and other small camera users. The camcorder market appears to be ready to strike back and challenge the dominance of DSLRs. It's a great time to be alive and passionate about video don't you think?

After yet another brawl in the *Videomaker* office for the top picks of the year, our editors

are ready to reveal the best of the best. And here they are...

## BEST Duplicator

### Vinpower Robotic Autoloader Aero VI

Vinpower's Aero VI is a six-tray, automated duplicator, with capacity for as many as 660 Blu-ray discs, DVDs or CDs. Once a project is set, simply walk away and let it do its thing. Setup and operation is relatively simple, with a fairly intuitive control panel and a (actually) helpful user's manual. Copies are made from a single master, or from multiple masters - without user intervention. For rapid delivery of large quantities of accurately produced discs, Vinpower Robotic Autoloader Aero VI is our BEST Duplicator.
